Tutorial: Part 3

# Setup Device for iOS Development

Created by: Steven King

Assistant Professor of Interactive Media

UNC School of Journalism and Mass Communication

---

# TUTORIAL PLAN

### Objective

Learn how to setup personal devices (iPad, iPhones) to use for development.

### Goals

Get through this a painless and possible!

### Time

Less than 1 hour if all goes well

### Outline

1. Finding Device ID
2. Create a provisioning profile
3. Install the provisioning profile
4. Upload the certificates to PhoneGap Build

### NOTE

This is a continuation of the iOS setup process. If you have not configured your Apple Developer account and generated a development certificate then you should go to the Setting Up iOS Development Tutorial

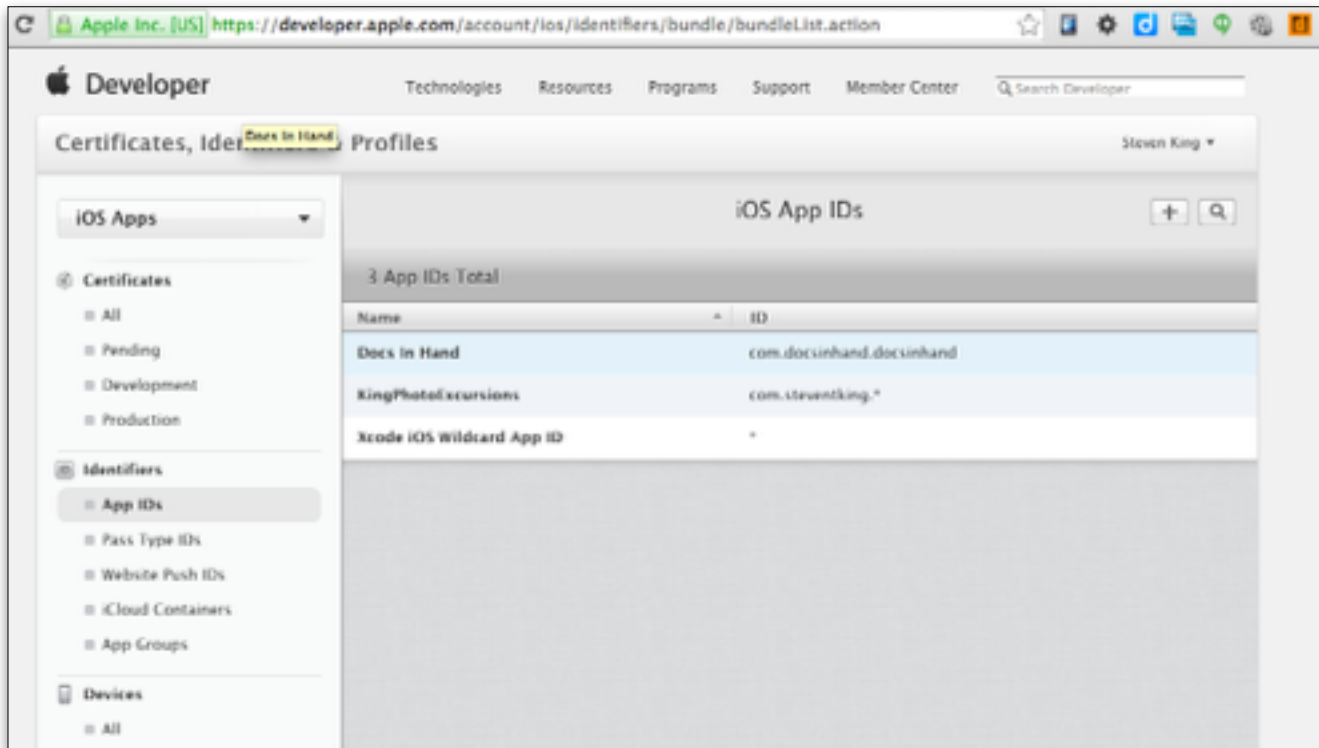

## 1. FIND YOUR DEVICE ID

This is required for each testing or development device. You will do this multiple times so I have broken it out into it's own separate tutorial.

This is a unique number/ID to be of each iPhone or iPad.

**Go to the Devices page in the [developer.apple.com](https://developer.apple.com) account by clicking All under Devices.**

---

**Click the Plus sign on the top left to create a new device**

**Enter a descriptive name for your device and avoiding special characters.**

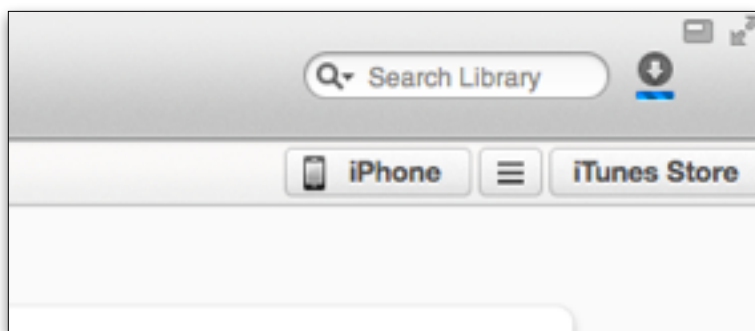

ex. Development iPad or Steven's iPhone

**Enter the UDID**

This is a unique 40 character string. Don't try to type it. just copy and paste.

**Open iTunes and connect your device**

**Click the device in the upper right of iTunes in the devices list.**

Click the Serial Number to view other data points like your UDID.

#### iPhone 5

King, Steven Timothy's iPhone

16GB  47%

Capacity: 13.26 GB

Phone Number: 1 (919) 360

Serial Number: C39JRBA4

iOS 7.1

A newer version of the iPhone software is available (version 7.1.2). To update your iPhone with the latest software, click Update.

#### iPhone 5

King, Steven Timothy's iPhone

16GB  47%

Capacity: 13.26 GB

Phone Number: 1 (919) 360

UDID: 2348B8056BB125A922F87

33" ~4734

iOS 7.1

A newer version of the iPhone software is available (version 7.1.2). To update your iPhone with the latest software, click Update.

[Update](#) [Restore iPhone...](#)

Right or Control Click and select copy. The UDID value will be on your clip board.

Return to the browser and paste your UDID value into the proper field.

---

---

☒ **Register Device**  
Name your device and enter its Unique Device Identifier (UDID).

Name:

UDID:

---

☐ **Register Multiple Devices**  
Upload a file containing the devices you wish to register. Please note that a maximum of 100 devices can be included in your file and it may take a few minutes to process.

Choose File...

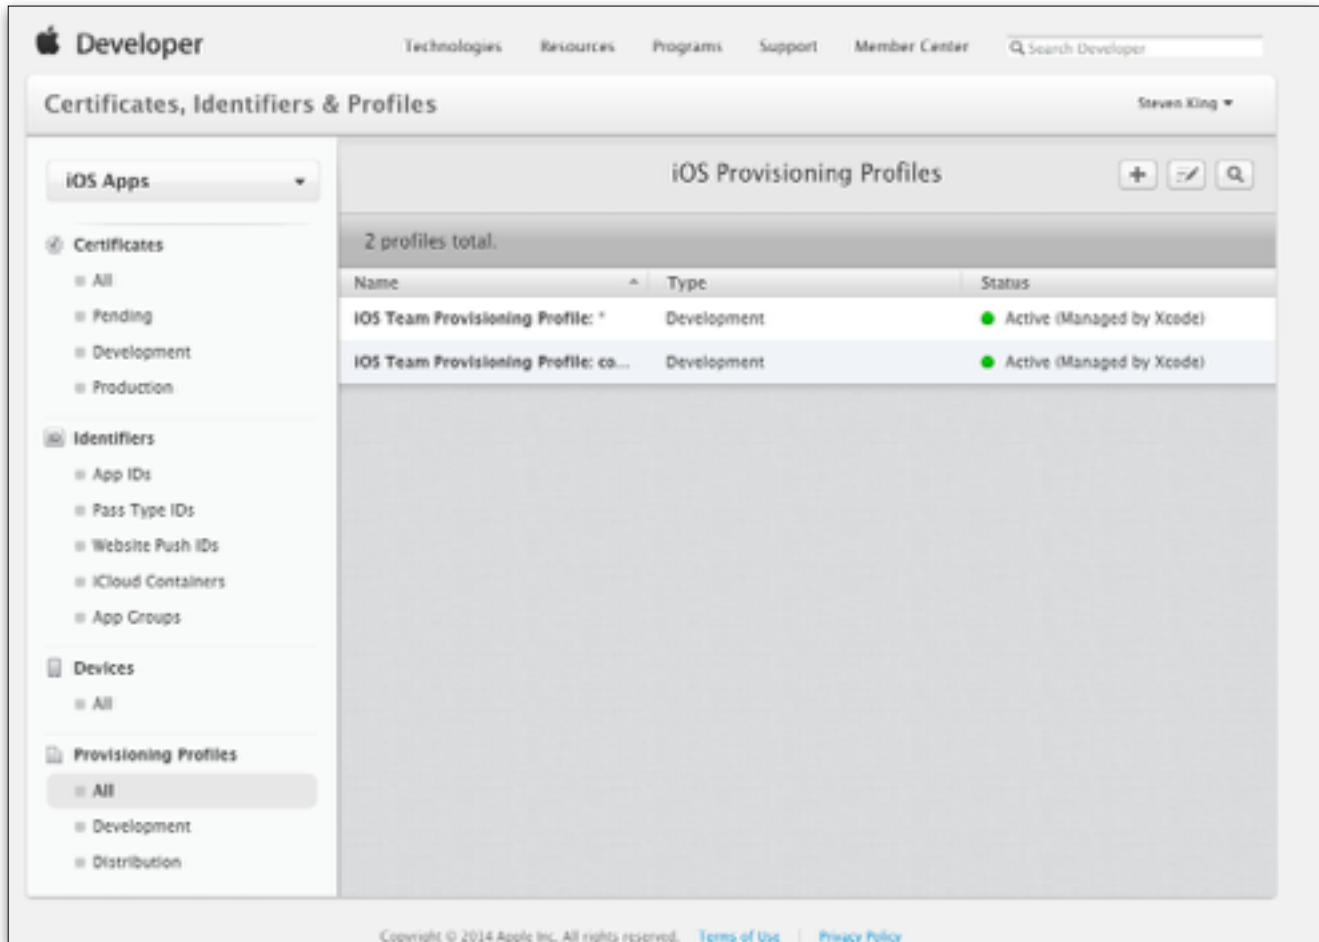

Cancel

Continue

## 2. CREATE A PROVISIONING PROFILE

**On the bottom left navigation Click on All under Provisioning Profiles**

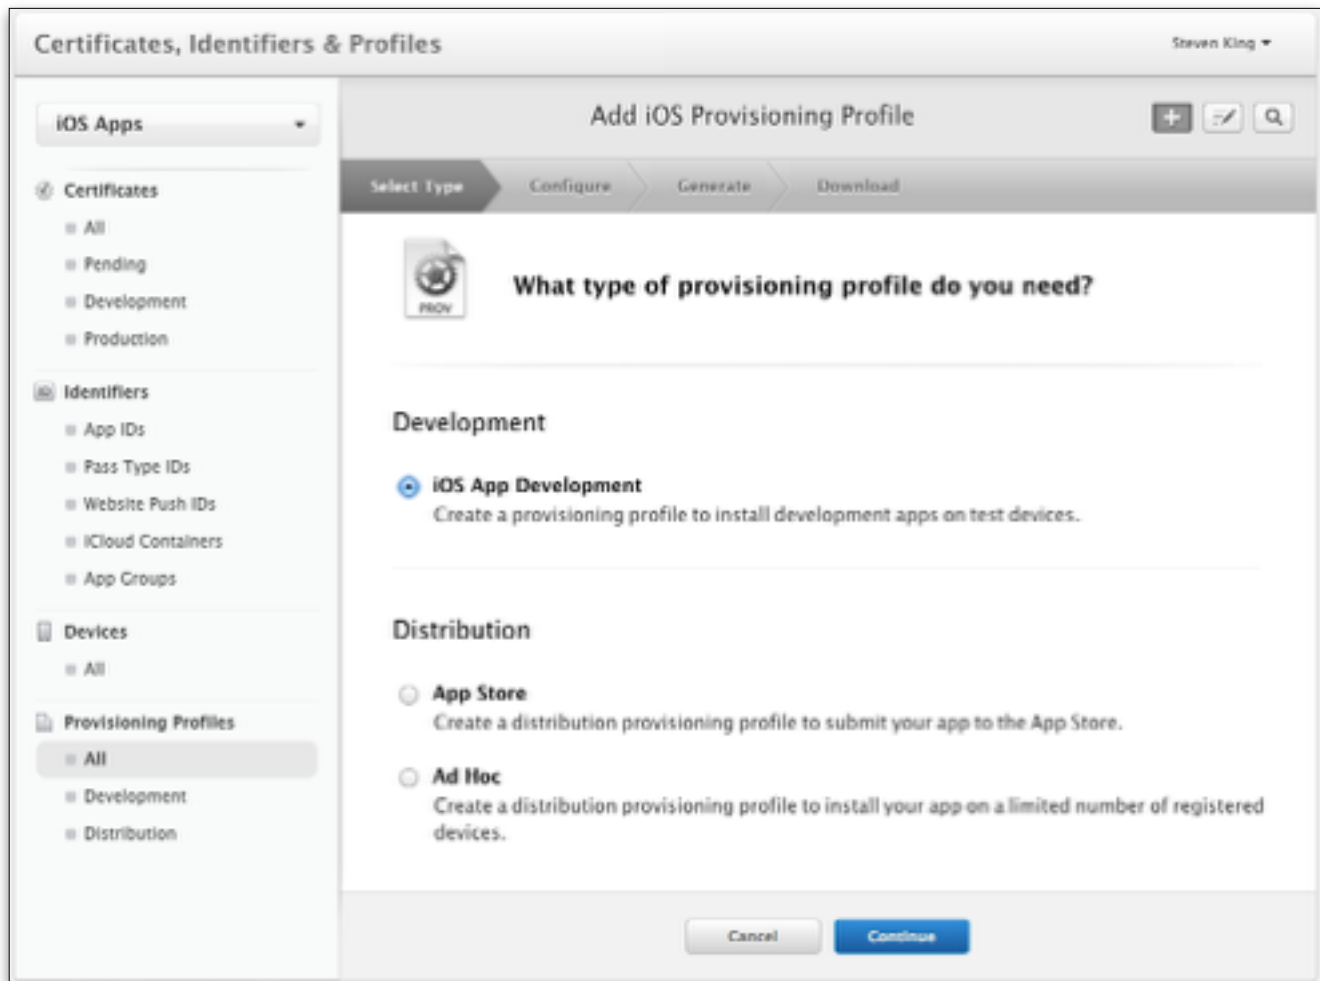

---

**Click the Plus sign in the upper right to create a new profile**

**Select iOS Development**

You will return to this screen when you are ready to submit to the App Store or testing with a larger group.

Select iOS App Development and click Continue

Select the certificate you just previously created and click Continue.

## Select certificates.

Select the certificates you wish to include in this provisioning profile. To use this profile to install an app, the certificate the app was signed with must be included.

☐ Select All

1 of 2 item(s) selected

Continue

---

**Download the created file and click Done.**

**Download and Install**  
Download and double click the following file to install your Provisioning Profile.

Name: PhoneGapPhotoExcu  
Type: Development  
App ID: 9L43NLXQ4H.com.steventking.\*  
Expires: Aug 08, 2015

Download

**Documentation**  
For more information on using and managing your Provisioning Profile read:  
[App Distribution Guide](#)

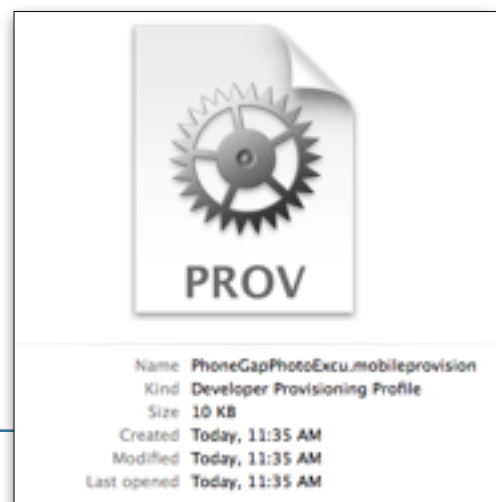

## 2. Install the provisioning profile

Now you need to add the development provision profile to your device

### Go to iTunes

**Drag the Provisioning Profile from your Desktop or Downloads folder to iTunes. If asked to replace, click ok.**

**Connect your device with the USB cord and click on your device in the upper left.**

---

**Click Sync in the lower right.**

Wait for iTunes to sync your device.

**Go to your device in the Settings —> General —> Profiles (scroll down) and you should see your profile.**

Note, mine has several but your's may only have one.

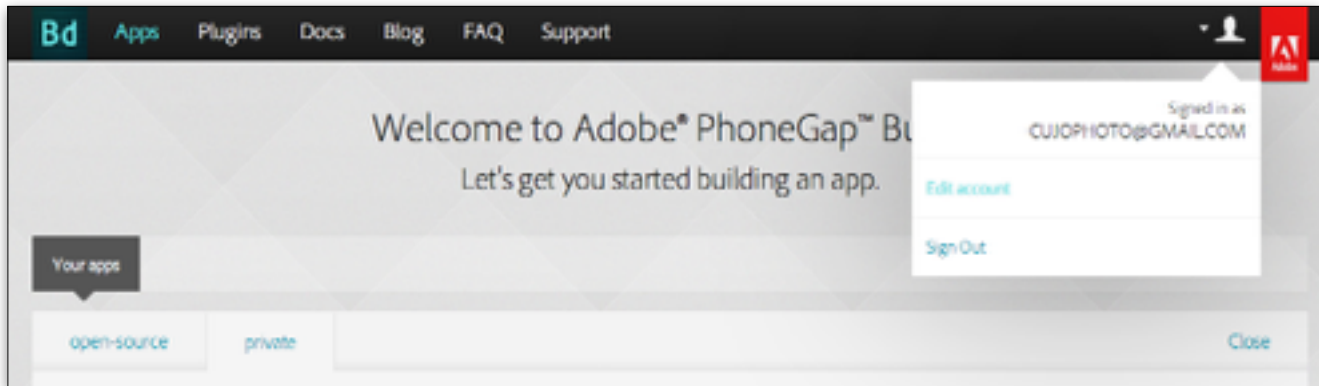

### 3. UPLOAD CERTIFICATES TO PHONEGAP BUILD

**Go to: <https://build.phonegap.com/> and sign in with your Adobe ID**

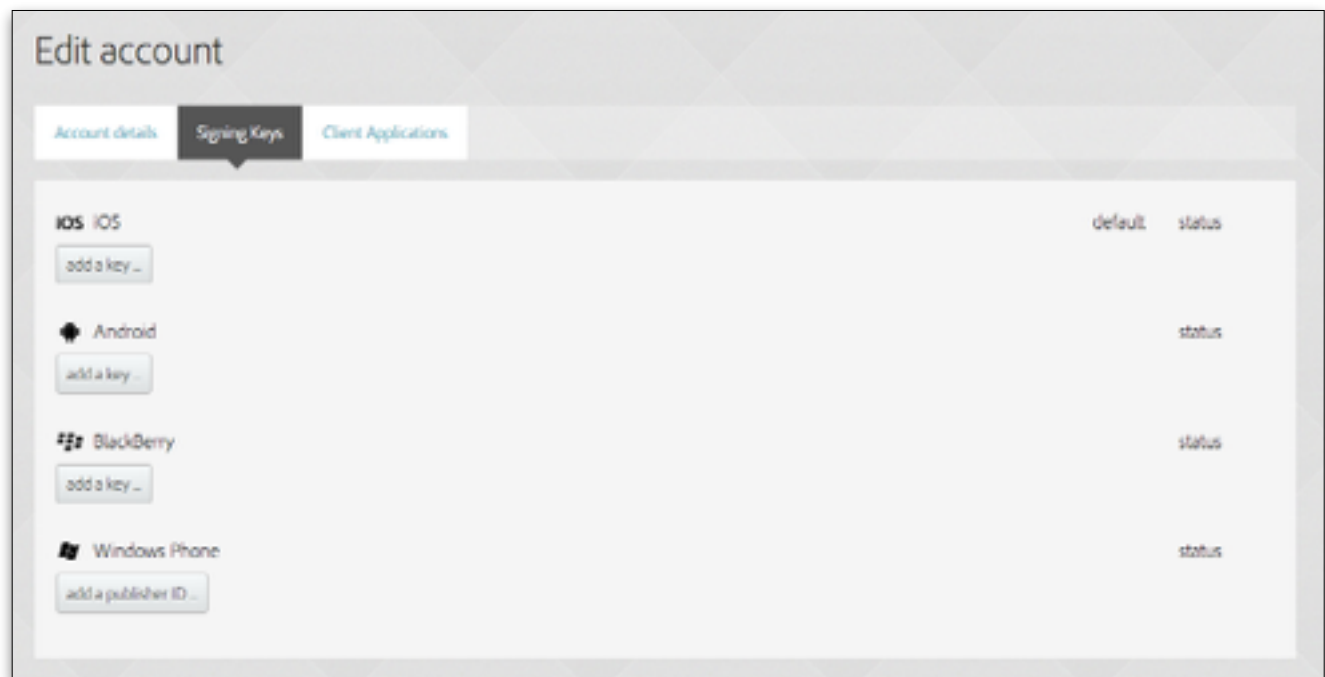

**Click on your Account icon in the top right and select Edit account.**

---

### Click on the Signing Keys.

Here we can upload each key for each respective device.

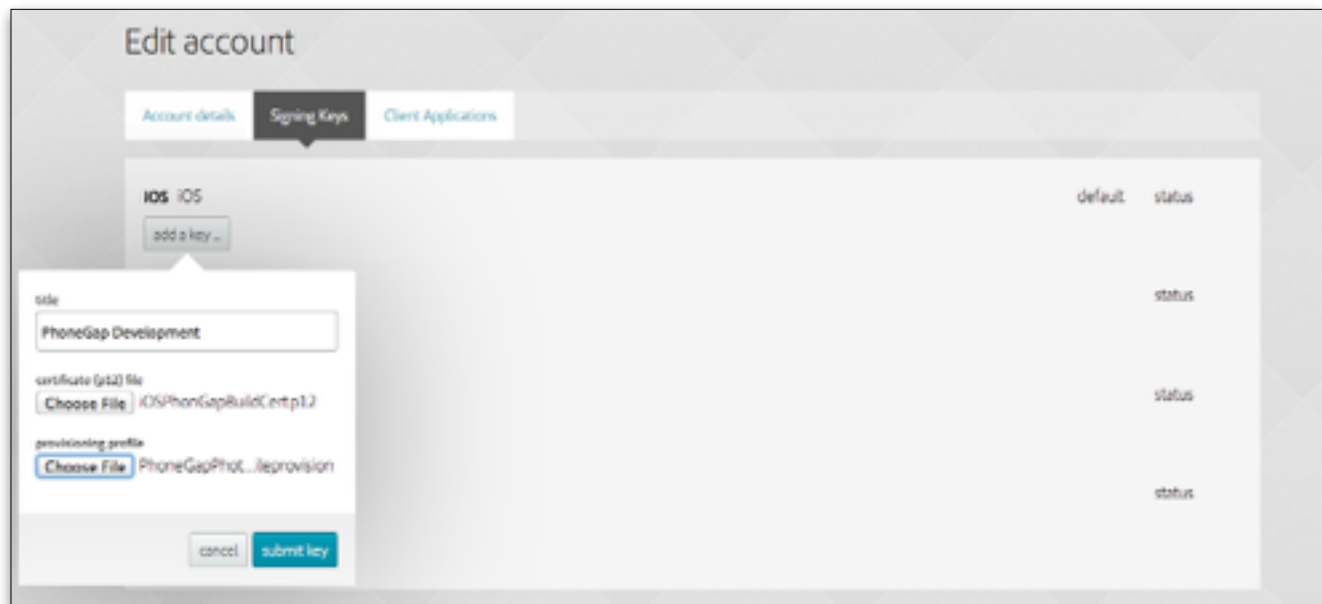

Click iOS add a key button

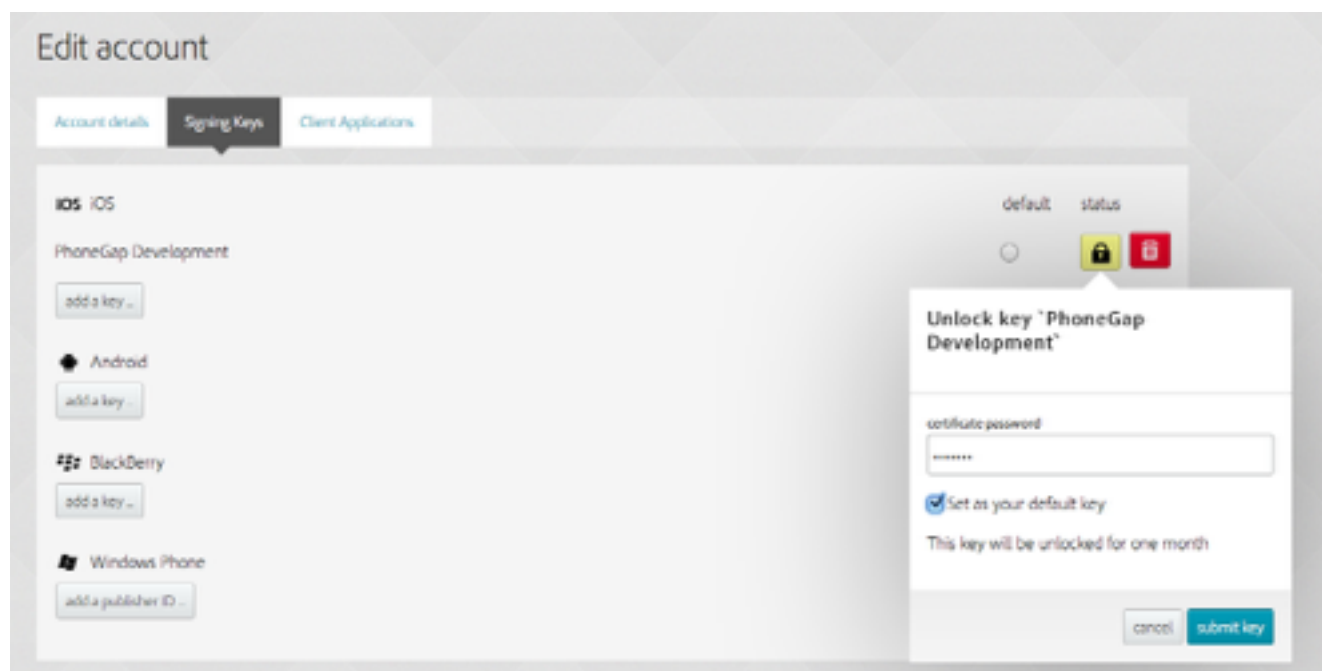

Give the Key a name like PhoneGap Dev Class

In the first field, select your .p12 file from your Downloads or Desktop folder.

In the second field, select your provisioning key (the one added to your device) and then click Submit Key.

At this point the key is uploaded but not unlocked. Click the lock and enter the provisioning password you set when creating it. (The one I said don't loose)

---

**You can set it as default and click Submit Key.**

Note: This will be unlocked for one month. If it is locked, simply return to this screen and enter your password.

**!!!!CONGRATULATIONS!!!!**

**YOU ARE NOW SET UP FOR IOS DEVELOPMENT ON PHONEGAP BUILD!**
